

Learn to Lead Policy Easy Read Version

Learn to lead

Learn to lead was developed by a former Steiner teacher called Susan Piers-Mantell. It supports people to lead projects that make a difference in their communities. It helps people to take responsibility for some things that are important to them.

Learn to lead encourages everyone to get involved in co-producing projects that are good for their communities and the charity.

It is important that staff are involved in Learn to lead. Some will be trained as team facilitators.

These staff will help people to become trained in using the Learn to lead tools.

They will also help set up Learn to lead project teams in every community.

Teams will also need a space in each community where they can hold meetings and work together.

Regional forums are gatherings where people come together to share and celebrate with people from other communities. The forums will be attended by trustees so they can hear what is going on in each community.

Community members will be able to use CVT Connect / Learn to lead App. People will have their own pages where they can share information with others.

This information is co-produced by the GOT IT learn to lead team for CVT communities.
