

Community Catalysts Working with Botton Village

Camphill Village Trust are going to be working with Community Catalysts and the people at Botton Village over the next two years.

They are a business who work with people who need care and support.

They have lots of experience of working with people who have a learning disability to make sure that they are connected to people and places near them and different groups to share and learn new skills.

We will be working with Community Catalysts in “partnership” which means that Camphill Village Trust will work closely with the people who live and work at Botton Village to make sure that people are involved and listened to.

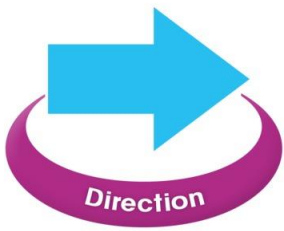

Community Catalysts will employ a person to work with staff and the people who live or are supported at Botton. They may ask to speak to you.

They will want to find out things like

- what you enjoy doing?
- what you would like to do?
- what are you are good at?

They will want to find out about the exciting things that happen in Botton, how more people can visit, and if they want to, get involved.

They will also talk to people in different parts of North Yorkshire to share the good work that you do. They will ask them how we can all work together to make things even better.

It will mean that we will see more people coming to Botton Village and sharing in what we do.

CVT and Community Catalysts will be working closely with everyone to make sure that you are involved and spoken to about the things that are important.

You may want to talk to staff or key workers about this. If you would like to find out more or if you have any questions. You can speak with Wayne or any of the care and support managers.
